

# Scott Lee

Berkeley, CA | [scott.lee.3898@berkeley.edu](mailto:scott.lee.3898@berkeley.edu) | [scottjlee.github.io](https://scottjlee.github.io) | [Flickr](#)

## Education

### University of California, Berkeley

c/o 2019

B.A., Computer Science; B.A., Statistics; 3.90

*Relevant Coursework:* Data Structures, Foundations of Data Sci, Techniques of Data Sci, Artificial Intelligence, Probability, Lin Alg/Diff Eq, Multivariable Calculus, Discrete Math

## Experience

### Brilliant, Inc. ([brilliant.org](https://brilliant.org))

Data Science / Education Intern | May 2017 - Aug 2017

- Conducted data analysis using SQL and Python on 1+ million emails to evaluate email algorithm effectiveness.
- Designed and produced curricula for "Math for Computer Science" and "Intro to Data Science" courses.

### ASUC Office Of The CTO, BerkeleyTime ([www.berkeleytime.com](http://www.berkeleytime.com))

Lead Engineer | Sept 2016 - Present

- Developed new features for UC Berkeley's most popular course catalog, with over 26,000 unique monthly users.
- Led small team of developers in designing implementing a new schedule builder feature., spearheading UI/UX redesign and optimized website user workflow.

### UCSF School of Nursing

Research Assistant | Aug 2017 - Present

- Applied convolutional neural networks to detect PVCs from ECG data by recognizing ST changes.
- Built a CNN to detect PAC beats in order to predict unstable heart conditions.

### Data 8, UC Berkeley (<http://data8.org/fa17/>)

Undergraduate Student Instructor | Aug 2017 - Present

- Prepared materials and taught lab section, developed and graded assignments, and facilitated class logistics.

## Technical Skills

**Programming:** Python, Pandas, TensorFlow, Java, SQL

**Web Development:** HTML, CSS/Less, JS, jQuery, Bootstrap

**Miscellaneous:** LaTeX, DSLR Photography, Lightroom, Sketch

## Selected Projects (more on my [website](#))

### Song Classifier (<https://github.com/scottjlee/song-classifier>)

- Created a classifier that was able to distinguish between country and rap songs based on lyrics frequencies.
- Achieved an accuracy rate of 89% and was selected as one of 10 winners of a 200-member Kaggle contest.
- Built with Python and TensorFlow.

### Jesture ([devpost.com/software/jesture-ver-ddoski](http://devpost.com/software/jesture-ver-ddoski))

- Worked on team of 4 at Cal Hacks 3.0 to build gesture application with the Synaptics touchpad.
- Implemented API for Spotify, Slack, Facebook, and more, then linked to a sleek web UI.
- Built with HTML, CSS, Javascript, jQuery, Bootstrap, JSON, Python, C, and AppleScript.

### Delta ([deltacalc.herokuapp.com/demo](http://deltacalc.herokuapp.com/demo))

- Online open-source calculus curriculum with textbook and randomly generated practice problems, with immediate feedback, hints, detailed solutions.
- Created algorithm that learns which types of problems a student has trouble with and gives extra practice.
- Built with HTML, CSS, Javascript, jQuery, Bootstrap, and Ruby on Rails.
